De Oostenwind

Venue - De Oostenwind

Title: De Oostenwind
Country: NL

Description

De Oostenwind is a historic inland cargo vessel built in Belgium in 1962. The nearly 39-metre-long ship is a traditional ‘spits’, a type of narrow cargo barge once widely used on the waterways connecting the Netherlands, Belgium and France. Its working past and preserved industrial character make it a fitting piece of Rotterdam’s maritime heritage.
